

Demonstration on Video

Date	12 July 2026
Project Name	Plugging into the Future: An Exploration of Electricity Consumption Patterns

Objective

The project demonstration video showcases the complete workflow of the Plugging into the Future: An Exploration of Electricity Consumption Patterns project. It explains the problem statement, data preparation process, SQL analysis, Tableau dashboards, Flask web application, and the key insights obtained from the electricity consumption dataset.

Video Demonstration Flow

1. Introduction to the project.
2. Overview of the electricity consumption dataset.
3. Microsoft SQL Server database setup and SQL queries.
4. Tableau dashboards and story explanation.
5. Flask web application demonstration.
6. Key findings and business insights.
7. Project conclusion and future enhancements.

Features Demonstrated

- Data import and preprocessing.
- SQL-based data analysis.
- Interactive Tableau dashboards.
- Tableau Story visualization.
- Flask web application.
- Responsive user interface.
- Business insights and reports.

Expected Outcome

The demonstration video provides a clear understanding of the project implementation, highlights the analytical capabilities of the solution, and illustrates how the application supports data-driven decision-making through interactive dashboards and visual reports.
